TOWN OF ALPINE

BOIL WATER ADVISORY LIFTED

MAY 28, 2026 - NOTICE IS HEREBY GIVEN The Town of Alpine has lifted the boil water advisory that was issued on May 21, 2026, for residents in the Trail Drive and Stoor Drive area following a water main break.

The advisory has been lifted after the water system was repaired, properly flushed and disinfected, and bacteriological testing confirmed that the water meets all safe drinking water standards. Two consecutive days of satisfactory Total Coliform (TC) sample results were received, and the EPA has authorized the advisory to be removed.

Residents may now resume normal water use for drinking, cooking, ice making, brushing teeth, and all other household purposes without boiling water.

The Town of Alpine appreciates the public's patience and cooperation during this advisory.

For questions, please contact the Town of Alpine Public Works Director at 307-880-2869.
